Mikros Systems' Manufacturing and Depot (M&D) Center in Largo Florida has been manufacturing high-reliability electronic systems for DoD and other customers for the past six years. We now offer build to print, box build, and testing services to third-party customers. Our fully staffed and certified facility provides the following:

## KEY OFFERINGS

- Complete kitting, assembly and testing services
- Fully qualified facility and personnel
- Flexible scheduling to accommodate rush jobs
- Surge capability for cooperative manufacturing
- Low cycle time and turnaround
- Turnkey solutions
- **Technical capabilities:**
  - Box build
  - Cable assembly
  - PCB rework/repair
  - Surface mount/through-hole/mixed technology
  - Mechanical assemblies/subassemblies

## QUALITY

Mikros Systems has an established Quality Management System (QMS) which complies with American National Standards Institute (ANSI) ISO 9001:2008 and Naval Sea Systems Command (NAVSEA) Standard Item 009-04. Our M&D Center is ISO 9001:2008 certified for assembly and test of electronic assemblies for military and commercial applications. Mikros personnel are certified in Association Connecting Electronics Industries J-STD-001, IPC-A-610, IPC-WHAA-A-620, and IPC-7711/7721.

Mikros Systems has been a successful DoD Small Business Innovator since the 1990s.

**WE DO TECHNOLOGY TRANSITION FROM CONCEPT TO DELIVERY!**
